# Anti-Slip Protection with Frixion Healthcare Fabric

Stools and chairs in hospitals and other clinical environments must be upholstered in coated fabrics that can be cleaned and disinfected with hospital grade disinfectants. Unfortunately, these coated fabrics are slippery, which reduces comfort as you slide forward away from the back support and may lead to falls and injuries.

The solution is healtHcentric's new Frixion Healthcare Fabric. It is the only healthcare fabric that can be called ergonomic in that it allows the user to stay firmly positioned in their seat. It also withstands hospital grade cleaners and disinfectants, including 10% bleach. Frixion is created by adding healtHcentric's proprietary anti-slip technology to a hospital grade coated fabric.

### Improved Safety and Comfort

Anti-slip seating surface reduces falls off of chairs and stools in labs, exam rooms, and other clinical areas.

### Superior Cleanability

Withstands hospital grade cleaners and disinfectants, helping prevent the spread of pathogens.

### Increased Productivity

Promotes concentration and improved performance with enhanced safety and comfort.

Available in 5 colors:

*Black*

*Dark Grey*

*Light Grey*

*Navy Blue*

*Bright Blue*

Frixion Healthcare Fabric is available on the seats of all healtHcentric seating products. Actual fabric color may vary from the colors and images shown on your monitor. Please contact your local sales reps to order samples.
