

healthHcentric Hip Chair

Designed to meet the needs
of orthopedic patients.

Assists the patient to sit and stand with minimal stress.

The **healthCentric Hip Chair** is designed to meet the needs of orthopedic patients. With a seat height of 26 inches, the design allows a hip flexion of less than 90° while assisting the patient to sit and stand with minimal stress on the hip joints. The built-in foot bar supports the patient getting in and out of the chair, and provides a place to rest their feet. The healthCentric Hip Chair is made with high resilient foam offering exceptional comfort and firm support.

healthCentric Hip Chair
